

ARTS LEARNING COMMUNIQUÉ #16

September 29, 2020

MATH, SCIENCE & MUSIC - The Herbie Hancock Institute of Jazz “An initiative that uses music as a tool to teach math and science to young people in public and private schools around the world. The program addresses the growing need for students to gain skills and acquire knowledge in science, technology, engineering and math (STEM) subjects and learn to think creatively. The Institute is collaborating with math, science, music and education experts at leading universities and in the private sector to develop a wealth of free engaging curricula, games, apps and other interactive online components.”

This communication is an effort to assist educators and parents to 1) encourage creativity in these times as a way to make sense of and express our voices around the issues our communities are up against and 2) to provide carefully curated open-access learning resources and inspiration.

Need a thinking partner? Have a resource to share?
